

VisualRip / VisualRip+

by Caldera

» Product Tech-Sheet

VisualRip/VisualRip+ are full featured production workflow solutions for large format Print and Print-to-Cut, packed with intuitive and sophisticated features : Hotfolders, Drag and Drop, Nest-O-Matik, integrated ICC color engine...

VisualRip/VisualRip+ are entirely modular to meet your future production needs. The software is easy to use, driving several printers simultaneously, with full control over which machine prints what and the easy ability to switch designated jobs to other queues.

VisualRip/VisualRip+ provide spot colour matching and real time output simulation, and also incorporate multi-printing routines such as step & repeat, Nest-O-Matik nesting and multi-printer spooling.

For reliable and high output quality, **VisualRip/VisualRip+** are the ideal RIP solutions for printing wide format jobs with eye catching colors and contrasts.

Printer settings in Visual

INCREASE YOUR PRODUCTIVITY !

VisualRip+ adds 2 major components to **VisualRip** :

+ **LAYOUT with COMPOSE** : This feature lets you lay out multiple file elements to create a single job. Merge, nest, stitch, rotate and combine different file formats, with manual or numeric positioning.

+ **TILING** : Enables you to split up documents in various strips for big format jobs.

Additional options :

- » **AddDriver** : additional printer drivers
- » **CostProof** : media/ink cost calculation prior to printing
- » **CostView** : price simulation from costs, overheads and margins.
- » **EasyMedia** : ICC profile creation with or without GMB Eye-One Spectrophotometer
- » **VisualCut** : solution to directly drive roll-cut devices.
- » **VisualUser** : view and control any of the Caldera solutions from other computers on the network.
- » **HPGL** support

» Ferrari Color USA

Caldera's RIP solution has allowed us to consolidate one RIP platform reducing training time and confusion while increasing throughput and quality.

Nest-O-Matik™ :
Automatically positions files across the roll or sheet for media and ink optimisation

Step & Repeat :
Sophisticated automatic feature to repeat files on a page. File is RIPed only once

Tiling feature™ :
Split up documents in various strips for big format jobs

VisualRip+ also includes Spot colours, PS/PDF RIP, ICC support, Task automation, Super Spooler, Layout with Compose, Tiling, SignMark, Raster image retouching, Fotoba Digitrim, White ink...
